

Project prompt (From project list): Your app will allow high school to college age users to record and respond to negative

personal feelings. See <http://psychcentral.com/lib/an-overview-of-dialectical-behavior-therapy/> for more information.

## Milestones:

By the coming Sunday, we plan to have the basic functionality working; firebase Realtime database, login/logout functionality, personal feed page, calendar page. We have already decided on basic application interface and functionalities. We also discussed some features in our meeting yesterday which we will get to once the above-mentioned basic functionality working as desired.

## Basic Application design:

### 1. User Interface

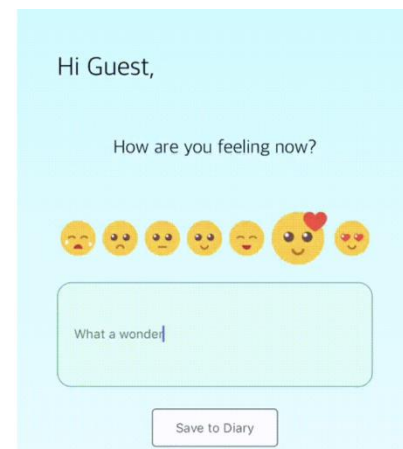

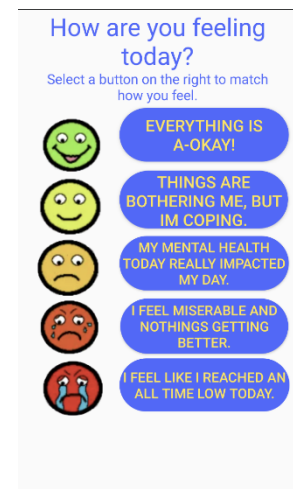

- a. Personal/ Calendar app interface: **Paulina Hong**  
<https://www.c-sharpcorner.com/article/how-to-create-calendar-view-in-android-application/>
- b. Title
- c. Navigation at the bottom: Navigation bar at the bottom to change between feeds.
- d. Public Feed + Login (Firebase): **Atul Shaurya**
- e. Add new feelings entry feed
- f. Personal feelings (when click on emoji) feed:  
**Katherine Sebina**

### 2. Features

- a. Login system
- b. Anonymous feed (publicly visible)
- c. Feelings dashboard by date (Calendar)
- d. Personal or publish

## Android systems we expect to use/implement:

1. Login system: Firebase real-time database
2. Post and comment features
3. Basic graphics in displaying emojis.
4. Fragments and layouts
5. Navigation bar
6. Public and private feed

## Peer evaluation:

1. **Paulina Hong:** Working on personal calendar feed. Attends meetings and contributes enthusiastically. Completes tasks on time.
2. **Katherine Sebina:** Working on personal feed and “on-click-emoji” activity. Also contributes with enthusiasm and attends all meetings.

All the team members have a good idea of what they want to do and are discussions have been conclusive and productive so far.
